PUBLIC SERVICE
COMMISSION

**RE: Kentucky American Water
Case 2007-00134**

December 21, 2007

We appreciate the commission addressing the water supply issue in Central Kentucky.

The decision your commission makes will affect thousands of Central Kentuckians for decades, not only financially but ecologically.

A 31 mile pipeline from Monterey pool 3 will not provide a long term draught protection to Central Kentucky. We need long range plans that are in the best interest of all Central Kentuckians.

Please take whatever time is needed to make the right decision. Should you need more time to review all options in more detail, Please take that time and consider all the possibilities.

Please reject the Kentucky American Water proposal before your commission at this time.

Sincerely,

**Bonnie Fraker
